Second Symposium on Aviation Research

Bergamo Online
February 5 & 6 / 2021

Call for Papers

The aviation industry has undergone profound transformations in recent times and the assumptions are that the market will continue to change remarkably in response to the challenges of a pandemic including new forms of competition, sustainable development and technological progression. This signifies that there are substantial aviation research challenges to confront and opportunities to seize. The **SoAR Symposium** is being launched as a research forum grounded in the fields of Operations Research and Economics in order to analyze aviation markets and push the boundaries of knowledge forward. The symposia will consist of: (1) invited talks by distinguished keynote speakers; (2) extended presentations and discussions of consolidated research; and (3) "pitch" presentations of research intentions, particularly those developed in the framework of doctoral and post-doctoral projects. The program will include approximately **4 full paper presentations with dedicated discussants** and some **shorter communications**.

The 2nd SoAR Symposium will take place online on the 5th and 6th of February 2021 from 13:00 to 16:00 Central European Time (CET) and is kindly being organized by the Department of Economics at the University of Bergamo. Researchers wishing to present and discuss their research at the 2nd SoAR should send an abstract to the email address symposium.soar@gmail.com **before the 30th of September 2020**, as follows:

- **Consolidated research** (45-minute presentation and discussion) – Extended abstract of 1,000 words. Full papers corresponding to accepted abstracts should be made available one month before the symposium.
- **Research intentions** (10-minute presentations) – Short abstract of 200 words.

Keynote Speakers:

- Federico Ciliberto, University of Virginia
- Amedeo Odoni, MIT

Decisions regarding paper acceptance will be made by 1st December 2020. Attendance at the SoAR Symposia is free of charge. Detailed information about the 2nd SoAR Symposium programme will be made available on SoAR's website (www.symposiumsoar.org).

Looking forward to meeting you online (especially in the coffee breaks),
Nicole Adler, Antonio Antunes, Christian Bontemps and Gianmaria Martini.
