

New Books on Aviation Management and Economics

– EAC/GARS Mondays' Webinar Series –

The aviation industry is still recovering from the Covid-19 pandemic and with it old and new managerial and economics problems regain or gain, respectively, importance. A set of new books dealing with business and economics issues of the aviation industry is now being published.

It is the purpose of EAC and GARS to promote the exchange of industry professionals and academics. This Mondays' Webinar Series on New Books on Aviation Business and Economics topics serves this purpose. It provides the book authors with the opportunity to share their insights and the audience the opportunity to comment on the book content. Each webinar will take 60 minutes and will give the audience plenty of opportunity to ask questions to the book authors.

The first webinar provides an overview of all books whereas the remaining webinars will concentrate on the presentation and discussion of only one book. See the following table for more detailed information:

Date/time	Editors/Presenters	Webinar/Book title
